

Automatic chip card reloader for copiers

CARTADIS CR3

To reload
chip cards
automatically

For a full
“self-service”
operation

The above **CR3** is fitted with a coin mechanism
and a banknote reader (ref. CR3-A)

- According to the **Cartadis CR3** chosen, chip cards can be reloaded against coin and/or banknote insertion (description overleaf).
- With **Cartadis CR3**, cards can be reloaded whether their credit had already been spent out or not.
- Such cards are solely intended for **Cartadis** terminals (chip cards), i. e. copier access control units.
- With **Cartadis CR3** and a set of **Cartadis** terminals, you can fit out a site of several copiers for full “self-service” operation.

Cartadis CR3

■ For checking cash and collecting sales statistics

Sales statistics can be read by the person in charge of the unit and viewed on the display screen or printed by means of the **Cartadis** printer (in option).

These data consist of:

- . receipts,
- . number of copies reloaded on the cards.

■ For setting the selling price

Cartadis CR3 is provided with a programming keyboard for determining the card reloading price.

■ Example of use

Cartadis equipment is especially suitable for a use in a public or in a university library.

This can be highlighted by the following example:

- . a library is provided with 8 copiers equipped with **Cartadis TCP2**'s,
- . a **Cartadis CR3** reloader is installed at the entrance of the library,
- . the selling price of the cards reloaded by the **Cartadis CR3** is set to 0,10 € per copy

- A coin insertion of:

0,50 € loads the card with	5 copies
1,00 €	10 copies

■ 3 models

CR3 : with coin mechanism only (6 different coins)

CR3-A: with coin mechanism and banknote reader (6 different coins - 3 banknotes)

CR3-B: with banknote reader only (3 banknotes)

Option for the 3 above models: card reader for combined use of chip and no contact "mifare®".
