

Network vending or management  
of copies and printed pages in network  
with the print server

## GESPAGE

---

---

Compatible with the  
networked printers  
PCL5  
PCL6  
Postscript

---

---

Compatible with  
Microsoft networks

- The **Gespape** print server matches all the needs for vending or managing copies and printed pages in network:
  - firms,
  - schools, universities,
  - public libraries.
- Installation is made easier with the supply of a server ready to use, no installation required on your server.
- It is compatible with the **Cartadis** range of magnetic card systems.
- A terminal of **Copicode-IP** type must be installed on every multifunction device for managing copies.

# Gespage for firm managing costs

**Gespage** deals with a hard management of copies and printing costs. Imperceptibly, it stores in a SQL database the following main information about copies printing jobs:

- sender's name (his NT login name),
- PC name,
- number of pages,
- cost (every printer may be parameterized with a different cost per page),
- date and time,
- name of a customer or a project associated with the document,
- a billing code (project) may be associated to every copy or printing.

Printer/Copier name	Print cost	Copied cost	Total cost
SystemC400	2261.45	0.00	2261.45
SystemC400_PS	27.30	0.00	27.30
HP_Laser	12.50	0.00	12.50
hpjet_writer	0.00	0.00	0.00
hpjet_writer	0.00	0.00	0.00
hpjet_writer	1.12	0.00	1.12
hpjet_writer	10.00	0.00	10.00
hpjet_writer	1.44	0.00	1.44
hpjet_writer	11.74	0.00	11.74
hpjet_writer	0.44	0.00	0.44
hpjet_writer	2474	0.00	2474
hpjet_writer	3.72	0.00	3.72
<b>Total</b>	<b>32782.86</b>	<b>0.00</b>	<b>32782.86</b>

The **Gespage** server management and query are carried out from an Internet browser. The **Gespage** web interface enables:

- the creation of printing queues,
- the parameterizing of prices per page and per printer,
- the users' gathering in departments,
- the multi-criteria query of the database.

Customers' stations:  
Windows 98 / NT / 2000 / XP

Optional window opening at the time of printing, it associates a name of customer or project to the document

Printer: hp\_JaboPS

Status: PRETE

Document name:

Issuing station: pc\_internet

Format: A4

Ink: Black\_White

Number of pages: 1

Price: 1.00

Confirm the Gespage Account to charge

Hide this job: Yes  No

Security code:  Re-enter:

Gespage Account: pc\_internet

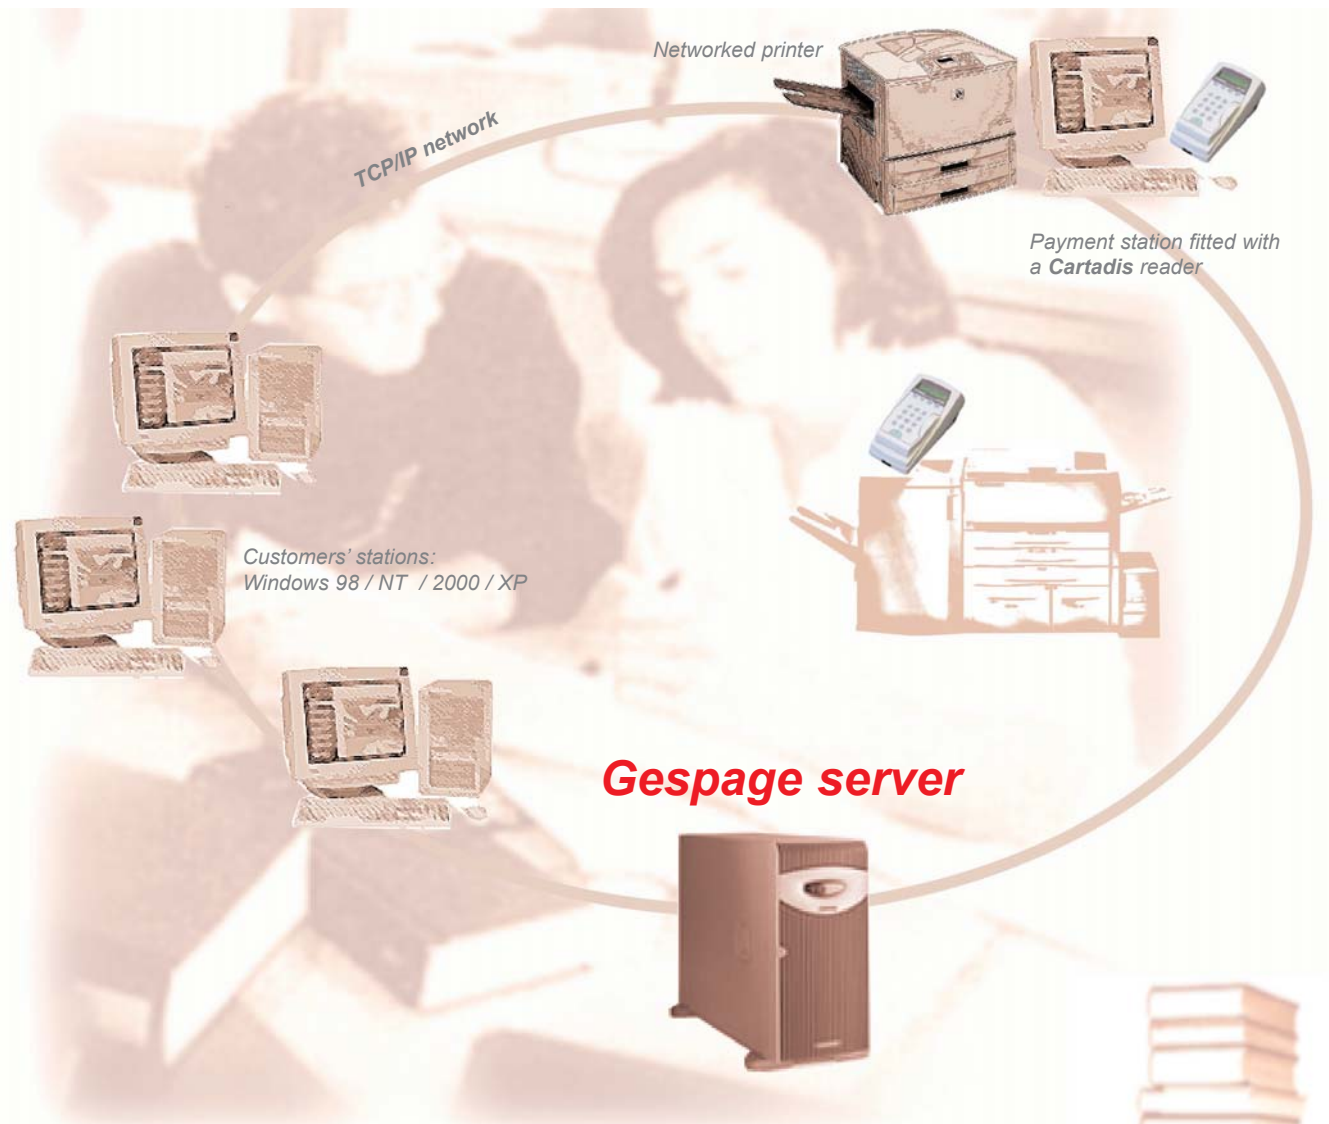

Buttons: Ok, Cancel

## Main specifications for firm configuration

- **Gespage** is compatible with the PCL5, PCL6 and Postscript printers featuring the TCP/IP Lpr protocol,
- compatible with the Windows 98 / Me / NT / 2000 / XP customers' stations,
- optional installation of a window for association purpose of a name to a document,
- password protection of documents,
- the ODBC interface enables the use of Microsoft tools for data integration to Excel for example,
- the knowledge of volumes for printing enables printing means to be correctly evaluated hence costs to be reduced,
- installation is easier by using the server ready to use.

**Gespage** deals with the payment of printings by using the **Cartadis** debit cards. It answers to users' request to pay documents printings printed out on networked printers and copies made on not connected photocopyers, with one card only.

**DRC4**  
automatic dispenser and reloader of  
**Cartadis** magnetic cards.  
It accepts coins and/or banknotes

### Main specifications for library configuration

- **Gespage** is compatible with the PCL5, PCL6 and Postscript printers featuring the TCP/IP Lpr protocol,
- compatible with the Windows 98 / Me / NT / 2000 / XP customers' stations,
- optional installation of a window for anonymous user identification,
- password protection of documents,
- payment of printings from a **Cartadis TCRS** card,
- reader connected to a payment station under Windows.
